Product Manager

Location: Melbourne

- Do you want to improve the quality of life for thousands of people each day?
- Do you love getting your hands dirty working on existing and green fields concepts?
- Do you have a passion for identifying and solving customer problems?
- Do you want to help shape product strategy in a fast-growing global company?

Then, we have a great opportunity for you.

Who are we?

We are a fast-growing, not-for-profit start-up with global ambitions. We are building a team to take us to the next level of growth.

Covidence wants to change the way the world creates and uses knowledge. We believe that key decision makers equipped with current, accurate and comprehensive evidence can dramatically improve lives.

Our big idea is to reduce the time it takes to get these insights from researchers to decision makers from years to months.

Our SaaS product called "Covidence" enables health and science research teams to rapidly synthesise and uncover actionable insights from the mountains of existing research in the world.

For example, the Australian Stroke Foundation is using Covidence to prevent severe disability or death in over 500 people a year.

Our technology is also assisting the Covid-19 pandemic response enabling global researchers and organisations to provide "living guidelines" based on the latest evidence.

We already have over 100,000 users, growing at 60%+ year on year and our growing list of customers include some of the world’s most prestigious universities and hospitals, including Harvard, Yale, Oxford, UCL, Monash, Sydney, to name a few.

And we are just getting warmed up....
We have:

- Meaningful work which is dramatically changing people lives globally
- A company who believes product is at the centre of everything we do
- An open mind to new ideas and approaches
- A fast-growing community of enthusiastic users who are cheering for us to be successful
- An amazing team to work with
- A supportive, flexible work culture

You have:

- A successful track record of leading the creation of SaaS product capabilities from ideation all the way through to go-to-market.
- Excellent skills in market and customer research and synthesising insights into product visions and concepts that others can build on.
- Demonstrated ability to collaborate, inspire and focus team members across product design, development, support, marketing and sales.
- A firm focus on user value with a pragmatic attitude to incorporating commercial goals as part of each product release.
- A data driven approach to product management.
- An ability to communicate complex ideas and concepts simply and clearly.

You may also have:

- Exposure to medical, science or academic industries.
- Experience of leveraging big data and machine learning capabilities

Next Steps:

If this sounds like your thing, then send us a cover letter and your resume to careers@covidence.org.

Note: you must have the right to work in Australia.
