Senior Product Designer

Location: Melbourne

- Do you want to improve the quality of life for thousands of people each day?
- Do you love getting your hands dirty working on existing and green fields concepts?
- Do you enjoy the creative process of sketching and iterating in lightweight forms or pairing with a developer to tweak the UI together?
- Do you want to have direct input into product strategy in a fast-growing global company?

Then, we have a great opportunity for you.

Who are we?

We are a fast growing, not-for-profit start-up with global ambitions. We are building a team to take us to the next level of growth.

Covidence wants to change the way the world creates and uses knowledge. We believe that key decision makers equipped with current, accurate and comprehensive evidence can dramatically improve lives.

Our big idea is to reduce the time it takes to get these insights from researchers to decision makers from years to months.

Our SaaS product, called "Covidence" enables health and science research teams to rapidly synthesise and uncover actionable insights from the mountains of existing research in the world.

For example, the Australian Stroke Foundation is using Covidence to prevent severe disability or death in over 500 people a year.

Our technology is also assisting the Covid-19 pandemic response, enabling global researchers and organisations to provide "living guidelines" based on the latest evidence.

We already have over 100,000 users, growing at 60%+ year on year and our growing list of customers include some of the world’s most prestigious universities and hospitals, including Harvard, Yale, Oxford, UCL, Monash, Sydney, to name a few.

And we are just getting warmed up....
We have:
- Meaningful work which is dramatically changing people’s lives globally.
- A company who believes design is at the centre of everything we do.
- An open mind to new ideas and approaches.
- A fast-growing community of enthusiastic users who are cheering for us to be successful.
- An amazing team to work with.
- A supportive, flexible work culture.

You have:
- A successful track record of leading customer research and synthesising insights into products users love.
- Demonstrated ability to lead a group through rapid iterations of lo/hi fidelity designs.
- Plenty of experience in defining information architecture without losing focus on best-practice usability.
- A pragmatic approach to product design with an ability to firmly focus on the end user whilst incorporating commercial goals.
- A proven ability to create, adhere to and advocate design principles at a company and project level.
- An ability to communicate complex ideas and concepts simply and clearly.

You may also have:
- Exposure to medical, science or academic industries.
- Experience in conceiving and implementing brand styles and visual systems (brand guidelines, colour palettes).

Next Steps:
If this sounds like your thing, then send us a cover letter and your resume to careers@covidence.org

Note: you must have the right to work in Australia.
